

Emissco

Experts in Aerosols and Liquid Filling

About Emissco

Emissco is a leading manufacturer of aerosols and liquids. All of our products are formulated in-house by expert chemists, ensuring excellent quality. We provide solutions for industrial, rail, automotive and transport applications – all of which can be easily rebranded and formulated to meet customer requirements, including bespoke formulations. Our products are tried and tested every day both by long-standing customers, our own transport fleet and sister manufacturing and engineering companies.

We operate a dedicated liquid manufacturing facility with multiple production lines in Cheadle, near Stoke, offering excellent logistics connectivity. Additionally, our remarkable toll [1] manufacturing service includes holding your inventory, enabling a fast turnaround and reduced capital for customers.

This large production capacity allows us to offer contract manufacturing services for the commercial market. Matched with extensive warehousing and a dedicated logistics framework, we offer everything you need to launch and distribute your new product competitively.

- Established product range
- Research + Development
- Contract manufacturing
- Bulk filling capabilities
- Warehousing
- Logistics

Customer Journey

At Emissco we take you on a journey. From the very beginning our team listens to your every need and creates a tailored solution that meets your requirements. We can handle every stage of product formulation, design, manufacture, packaging and distribution, ensuring smooth delivery and a simple experience for you.

PRODUCT DEVELOPMENT

Emissco is at the forefront of innovation, providing businesses with a cost effective method to deliver aerosol and liquid products to market quickly. Our extensive product testing means we are equipped to offer a service to match any requirement. We can develop new products with bespoke formulations as well as improve existing formulas from both the customer and our existing range.

ARTWORK AND DESIGN

Alongside developing aerosols and liquids products, our in-house design team can help take care of the packaging. We work with our customers to produce eye-catching branding to ensure products stand out, displaying a distinct brand identity. This gives them an edge in a competitive market. In addition to this, our experts are also able to assist with product compliance, ensuring all requirements are met.

MANUFACTURE AND PRODUCTION

We offer a contract manufacturing service that reduces costs whilst also providing high-volume capabilities. This means that our customers can deliver products to market faster, helping to secure profitability. Our facility is capable of flexible production to support both large and small batches.

PACKAGING AND DISTRIBUTION

Our fully-equipped facilities mean that we can package any amount of aerosol and liquid products ready to go to customers. We offer a wide selection of aerosol cans, bottles, vessels and IBCs in addition we can also offer bespoke packaging solutions. Furthermore, our dedicated, in-house logistics fleet ensures that products are delivered on time, every time.

Quality + Standards

As a UK manufacturer with extensive experience managing and distributing a large range of aerosol and engineered liquid products Emissco makes quality, safety and standards compliance a priority.

Our formulations use the best quality components and our range of propellant options include the latest technology to ensure both product performance and environmental awareness.

Private label

We can also support businesses with a well-established brand and product line-up. Working with you, we can create any product within your brand, meet your production requirements and help further with packaging and distribution.

Our team is also experienced in supporting product optimisation and innovation. We will work with you to establish your goals and highlight any changes we can make to ensure your product is ready for production, with optimum quality, efficiency and economy.
